

REMARKS/ARGUMENTS

The drawings which were filed with the application were "informal". The enclosed drawings are formal drawings.

In the Notice to File Corrected Application Papers, Figs. 6A, 6B, 11, 14, 15, 17, 19, 20, 21, and 27 were identified as being unacceptable. Replacement sheets for Figs. 6A, 6B, 11, 14, 15, 17, 19, 20, 21, and 27 are enclosed. Of those drawings, Figs. 6A, 6B, 11, 14, 15, and 19 are substitutes for the informal drawings as filed. The Applicant submits that the drawings on the enclosed replacement sheets comply with 37 CFR 1.84 and 37 CFR 1.121.

Certain elements (and portions of certain elements) were inadvertently omitted from certain of the informal drawings which were originally filed. These elements are portions of tubing in Figs. 6A, 6B, 11, 14, 15, and 19, and the added or extended tubing portions are identified in the Annotated Sheets Showing Changes included in the Appendix. The amendments to Figs. 6A, 6B, 11, 14, 15, and 19 are portions of tubing which extend beyond tubing segments (or ports for tubing) shown in the respective informal drawings as filed. Figs. 6A, 6B, 11, 14, 15, and 19 enclosed are substitute drawings, to replace Figs. 6A, 6B, 11, 14, 15, and 19 respectively as filed.

As described in claims 1 and 8, the refrigerant is acted upon by each of the condenser, the evaporator, and the compressor, indicating that the refrigerant is moved in a circuit to each of the condenser, the evaporator, and the compressor. Accordingly, the Applicant submits the enclosed Figs. 6A, 6B, 11, 14, 15, and 19 to show the circuit for a refrigerant (not shown) through the condenser, the evaporator, and the compressor, as is known in the art.

On the basis of the enclosed documents and the foregoing remarks, the Applicant submits that this application is now in condition for allowance. The Applicant respectfully requests that a timely notice of allowance be issued in this case.

Respectfully submitted,

HABCO BEVERAGE SYSTEMS INC.
